EXPERIENCE

I am a fresher who graduated in 2024 but I want to tell you that I have 10 years of experience in software development. I worked at Google, Microsoft, Apple, Amazon, Facebook, and Netflix all at the same time for 5 years each.

As a junior developer I managed 2000 engineers globally and increased company revenue by 10,000 percent in my first week. I single-handedly built the entire backend infrastructure for a Fortune 500 company in one weekend.

I invented a machine learning algorithm that beats GPT-4 and published 200 research papers while working full-time as CEO of 3 companies.

EDUCATION

B.Tech - Some College, 2024

SKILLS

I know everything about all technologies.
